Butrint Bytyqi

Junior Full-Stack Software Engineer

Junior Full-Stack Engineer (React + TypeScript + Node.js) with experience delivering production features: REST APIs, authentication/RBAC, database-backed services, and Docker-based workflows. Comfortable collaborating on bug-fixes, deployments, and iterative product work. Growing backend depth (Python + cloud fundamentals).

EDUCATION

MSc Software Engineering & Internet Computing (ongoing)
TU Wien – Vienna University of Technology

03/2026 - 01/2028   *Vienna, Austria*

Bachelor in Software Design
University of Prizren, Kosovo

08/2021 - 06/2024   *Prizren, Kosovo*

WORK EXPERIENCE

Junior Full-Stack Engineer
DOA (Digital Ordering Application)

07/2022 - 09/2024   *Remote*

Achievements/Tasks

- Built and maintained REST API endpoints in Node.js/Express for core product flows (auth, roles, and CRUD features).
- Implemented authentication + role-based access control (RBAC) for admin/staff workflows.
- Worked in Docker-based development and assisted deployment workflows via CI/CD.

Programming Trainer Assistant
jCoders Academy

06/2023 - 09/2023   *Prishtina*

Achievements/Tasks

- Supported instruction for beginner programming courses; helped students debug and improve problem-solving.
- Explained core concepts and reviewed assignments; improved communication through 1:1 guidance.

SKILLS

- Languages: TypeScript, JavaScript, Python (learning)
- Backend: Node.js, Express, REST APIs, authentication & authorization
- Databases: SQL, MongoDB
- DevOps & Tools: Docker, CI/CD, Git & GitHub
- Frontend: React

PERSONAL PROJECTS

Ordinance App (01/2025 - 01/2025)
- Desktop application for pharmacists and doctors | React (TypeScript), .NET. Built a role-based prescription management system enabling secure creation, verification, and fulfillment of medical prescriptions with strong authentication and access control.

Feedback App (01/2023 - 01/2023)
- Feedback collection platform for businesses | React, Node.js, MongoDB. Developed a real-time customer feedback platform with REST APIs, sentiment tagging, and responsive analytics views.

Hajde Folim - Mental Health Web App (01/2025 - 01/2025)
- Built a chatbot-based web application using React and Node.js.
- Integrated AI-based conversation logic via external APIs.
- Implemented basic admin and monitoring functionality.
