LinkedIn

Experience

Mercor Intelligence

JUL 2026 TO PRESENT

Independent Contractor, Remote

Software Engineering Expert / Generalist Expert

- Review software engineering tasks, code changes, tests, and AI-generated solutions to help improve AI coding models.
- Check whether technical solutions are correct, reliable, and follow the given requirements.
- Previously evaluated AI-generated business presentations for content quality, design quality, and instruction following.

Attanda

MAR 2026 TO PRESENT

Vienna, Austria

Founding AI Systems Engineer

- Build AI voice and chat systems that help businesses automate customer communication and daily tasks.
- Develop backend services and connect AI systems with company data, tools, and business processes.
- Use Python and Google Cloud services to build, deploy, monitor, and improve production AI systems.

DORA Consulting

JAN 2026 TO PRESENT

Remote

Software Engineer

- Build and maintain a business management platform using Next.js, NestJS, TypeScript, PostgreSQL, Prisma, and Docker.
- Develop features for customers, suppliers, invoices, payments, payroll, reports, users, and permissions.
- Work from database and backend development to frontend, testing, deployment, and production fixes.

DOA | Digital Ordering Application

JUL 2022 TO SEP 2024

Remote

Full-Stack Engineer

- Built software for restaurants that allowed customers to order through QR codes and helped staff manage orders more efficiently.
- Developed backend APIs, database features, payments, dashboards, notifications, analytics, and kitchen order tools.

Selected Work

Wolke 7

BOOKING PLATFORM

- Improve a hospitality booking platform used to manage reservations, seating areas, capacity, and daily bookings.
- Built clearer booking flows, availability checks, booking status tools, daily views, and printable reservation lists.

Co-Pilot for Lawyers

LEGAL AI DEMO

- Built an AI assistant with a small team that reviews PDF contracts and highlights possible GDPR and DORA risks.
- Developed the document processing, search system, AI connection, and simple Streamlit interface used to ask questions about contracts.
